Strategic Trial Simulation - Clean Deployment Package

🎯 What's Included

This is a **complete, clean project** with all the latest enhancements:

✅ Latest Features

- **Enhanced Strategic Courtroom** with pre-trial case file screen
- **"Start Trial" button** and proper trial initialization
- **Sign out buttons** on all screens
- **Improved evidence presentation** with timeline
- **Collapsible case file** for reference during trial
- **Trial phase navigation** and controls
- **Custom branded email system** for user confirmations
- **All bug fixes** applied

✅ Clean Project Structure

- **No conflicting files** - removed old Courtroom.tsx
- **Proper component organization**
- **Updated dependencies**
- **Vercel-ready configuration**

🚀 Deployment Instructions

Step 1: Clear Your Repository

1. **Delete everything** in your current GitHub repository
2. **Keep only** the `.git` folder and any `.github` workflows you want to preserve

Step 2: Upload This Package

1. **Extract this entire package** to your repository folder
2. **Copy all files and folders** (including hidden files like `.gitignore`)

Step 3: Deploy to Vercel

```
# Navigate to your repository folder
cd your-repository-name

# Add all files
git add .

# Commit the clean project
git commit -m "Fresh clean deployment - Strategic Trial Simulation
v2.0"

# Push to GitHub
git push origin main
```

Step 4: Configure Vercel

1. **Vercel should automatically detect** the React/Vite project

2. **Build settings** should be:
   - Build Command: `npm run build` or `pnpm build`
   - Output Directory: `dist`
   - Install Command: `npm install` or `pnpm install`

Step 5: Add Environment Variables

In your Vercel dashboard, add these environment variables:

```
VITE_SUPABASE_URL=https://frgacnilaymjjthobztp.supabase.co
VITE_SUPABASE_ANON_KEY=eyJhbGciOiJIUzI1NiIsInR5cCI6IkpXVCJ9.eyJpc3MiOiJzdXBhYm
```

🎮 What You'll See After Deployment

1. Authentication

- Clean login/registration pages
- Custom branded confirmation emails
- Proper error handling

2. Game Modes

- Mode selection interface with all options
- Junior Justice, Training Academy, Career Progression
- Strategic Trial Simulation (main focus)

3. Strategic Trial Simulation

- **Pre-trial screen** with:
- Case file overview
- Evidence preview

- Strategic tips

- Role information

- **"Begin Trial Proceedings" button**

- **Main trial interface** with:

- Phase indicators

- Evidence timeline

- Collapsible case file

- Sign out option

- Proper navigation controls

🔧 Troubleshooting

If Deployment Fails

1. Check Vercel build logs for errors

2. Ensure all environment variables are set

3. Try clearing Vercel cache and redeploying

If Features Don't Appear

1. **Hard refresh** browser (Ctrl+Shift+R)

2. **Clear browser cache** completely

3. **Try incognito/private mode**

4. Check browser console for errors

Support

If you encounter any issues, provide:
- Vercel deployment logs
- Browser console errors
- Description of unexpected behavior
